Commitment to Our Customers

Whether you are making a choice to provide your CSPD with education, management training or improved departmental output and support, Arrow Medical imparts an approach that offers flexibility and focuses on staff input to better your facility.

ARROW

ARROW MEDICAL SUPPLY, INC.

Arrow Medical Consulting will provide your facility with a customized approach that will assist your Central Sterile Processing Department to meet and exceed their customer service goals.

Assessment Services

We provide a full-system review of your current instrument cycle. Our consultants are trained to provide recommendations for workflow improvements, instrument management and a review of your policies and procedures to meet regulatory compliance.

Process Improvement and Interim Management Services

Provides the capabilities for CSPD to run at peak performance levels. Our consultants are equipped with tools and streamlined approaches to assist in the transformation of your CSPD to meet or exceed the industry standard.

Capacity Planning Services

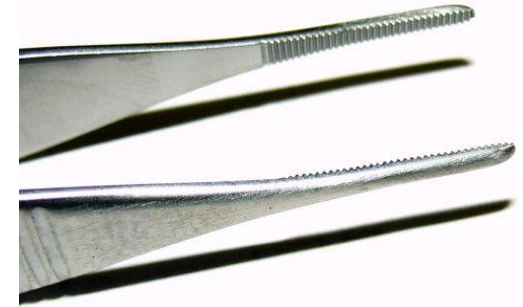

Allows management to adequately identify and develop long-term operational plans that include equipment planning, space requirements and operational/capital budget planning.

Education and Training Services

Can be customized to meet your department's individual needs. It is vital for CSPD to meet the challenges it faces, whether they be new orientation, instrument care and handling or management training.

Leadership and Mentoring Services

Promotes an organization-wide understanding of expectations regarding workflow, quality assurance and education.
